AUFW00076 Feast Watson Outdoor Furniture Oil

Introduction

Part A
840-Line

Description and Image

Feast Watson Outdoor Furniture Oil has been specially formulated to preserve and maintain the natural look of outdoor timber settings. Outdoor Furniture Oil has UV and mould resistant properties with excellent water resistance and is available in a range of timber tones. With added eucalyptus oil, Feast Watson Outdoor Furniture Oil penetrates deeply into the timber and will not crack or peel.

Note: Outdoor Furniture Oil 'Clear' is not recommended to withstand extreme conditions and direct sunlight. The timber toned Outdoor Furniture Oil enhance and extend the life of the natural timber colour by allowing higher levels of UV protection to be added for longer lasting protection.

Features and Benefits

- Penetrating film
- Transparent
- Matt finish
- Will not crack or flake
- Allows grain and texture to show
- Gives natural look to timber

Uses

All exterior timber furniture.

Precautions and Limitations

Drying times are given at 25°C and 50% relative humidity. Lower temperatures or higher humidity can lead to extended drying times.
Do not apply in temperatures under 10°C or above 35°C or when rain or heavy dew is expected within the coating dry time.

Performance Guide

Weather **Good**	Heat Resistance **Up to 100C**
Water **Good**	

Typical Properties

Colour
4 timber tones plus Clear

Components	Number of Coats
1	**2**

Toxicity	V.O.C. Level
Lead free	**< 620g/L**

Meets GBCA V.O.C. Requirements?
No

Touch Dry
6 hours

Clean Up Description
Mineral turpentine.
To avoid spontaneous combustion of contaminated application cloths, soak application cloths in water or immediately spread used application cloths flat in a cool, well ventilated area to dry completely before disposal. Do not scrunch up or place cloths on top of each other.

Application Methods

Brush **Spray**

Application Conditions

Solids by Volume: **20**

	Min	Max	Recommended
Recoat Time (min/hours)	**12 hours**		
Theoretical Spread Rate (m²/L)	**6**	**10**	

Typical Property Notes

Coverage
6 - 10m2 per litre.
500ml should provide 2 coats for an average 3 piece outdoor setting, while 1 litre should provide 2 coats for an average 5 piece outdoor setting.

Drying time
Drying times are given at 25°C and 50% relative humidity. Lower temperatures or higher humidity can lead to extended drying times.
Touch Dry: 6 hours
Recoat: 12 hours

Application Guide

Surface Preparation

New Timber
Allow new timber to weather in its final position for 4-6 weeks.
Prepare timber for coating with Feast Watson Woodclean as per the instructions.
For best results, lightly sand the surface to remove any grain raise. Remove all sanding dust before coating.

Weathered Timber
Prepare weathered or grey timber by cleaning thoroughly with Woodclean as per the instructions.
Sanding may be required to remove stains and restore deteriorated surfaces. Remove all sanding dust before coating.

Previously Coated Timber
Timber coated with stain or oil can be coated with Outdoor Furniture Oil after the surface has weathered. Test if the surface is ready by sprinkling water onto the timber, if the water absorbs into the timber it is suitable for coating. If the water beads, further weathering, sanding or stripping is required.
Painted or varnished surfaces need to be taken back to bare timber by stripping or sanding.
Prepare timber for coating with Woodclean as per the instructions.

Application Procedure and Equipment

Allow the timber to dry completely before applying Outdoor Furniture Oil
Outdoor Furniture Oil should be stirred thoroughly before and during application with a flat blade stirrer taking care not to introduce bubbles.
If the job requires more than one can of Outdoor Furniture Oil, mix all together in one large container prior to commencing.
Apply one coat of Outdoor Furniture Oil using a brush or spray. If applying with a spray, back brush the coating to ensure even penetration. Work along 3-4 planks at a time, in the direction of the grain. Ensure edges and end grain are fully coated.
Allow first coat to dry for 12 hours before applying a second coat.

Do not apply in temperatures under 10°C or above 35°C or when rain or heavy dew is expected within the coating dry time.

Maintenance
Regularly monitor coated timber for signs of colour loss, dryness and weathering.
If required, clean the surface using Woodclean, allow the surface to dry and recoat with one coat of Outdoor Furniture Oil.

Health and Safety

SDS Number	SDS Link
