

AUPR00009 Dulux Professional Polyurethane Matt

Introduction

Part A
394-84184

Description and Image

Dulux Professional Polyurethane Quick Dry Matt is an interior quick drying tough polyurethane clear which dries to a hard uniform flat finish. Excellent mar resistance properties.

Features and Benefits

- Attractive flat finish
- Quick drying
- Mar resistant
- One pack
- Highlights the natural timber look, an attractive subtle matt finish.
- Polyurethanes dry faster than varnishes. Saves time between coats.
- Tougher & longer wearing than a varnish or French polish.
- No messy mixing two cans, no limited pot life. Saves time & no wastage

Uses

Dulux Professional Polyurethane Quick Dry Matt is an attractive, mar resistant, flat finish on furniture, doors, skirtings, handrails, timber panelling and cork tiles. It is not recommended for floors.

Precautions and Limitations

All preparation and painting must conform to AS2311: The Painting of Buildings.

Do not apply if the surface temperature is below 10C or conditions indicate it will fall below 10C during the drying period.

If the temperature falls towards 10C or if the humidity is high, ensure air circulation is adequate by opening a window and using a fan.

Not suitable for use on floors.

Performance Guide

Weather For interior use only, not recommended for exterior use.	Salt Good resistance to salt splash
Heat Resistance Up to 120C. Premature yellowing and embrittlement if film subjected to continuous heat.	Water Good resistance to water splash.
Solvent Resists alcohol and hydrocarbons. Film is liable to attack from other strong solvents.	Abrasion Moderate resistance to abrasion.
Acid Suitable for dilute splash	Alkali Suitable for dilute splash

Typical Properties			
Gloss Level 5-15 at 60 degrees		Thinner Mineral Turpentine	
Colour Clear when dry, but appears milky in the can.			
Components 1		Number of Coats 3	
Toxicity Lead free. Dry film is non-toxic and conforms to AS1647, Part 3.		V.O.C. Level < 450g/L untinted	
Touch Dry 2 Hours			
Clean Up  Thinner			
Clean Up Description Clean all equipment with mineral turpentine.			
Application Methods  Airless Spray  Brush  Roller			
Application Conditions		Solids by Volume	
		43	
	Min	Max	Recommended
Wet Film Per Coat (microns)	62	62	62
Dry Film Per Coat (microns)	27	27	27
Recoat Time (min/hours)	6 Hours	Indefinite	
Theoretical Spread Rate (m ² /L)	16	16	16

Application Guide

Surface Preparation

Surfaces must be clean, dry and completely free from wax, floor polishes, etc. Surfaces previously painted with clear must be thoroughly sanded in direction of the grain to remove all traces of gloss. Fill all nail holes and cracks and sandpaper smooth in the direction of the grain, dust off with a soft clean cloth. For a superfine finish, fill open grained timber with a suitable filler. Stain bare timber surfaces if required with an interior stain.

For best results, seal timber grain with one coat of Dulux Professional Prepcoat Sanding Sealer before finishing coats.

Application Procedure and Equipment

Brush, roller, conventional or airless spray

Stir thoroughly with a broad flat stirrer, using an upward lifting action.

Brush/Roller

For a fine finish apply by brush or spray.

Airless/Conventional Spray

Suitable for application by all standard spray equipment. If necessary thin with spraying thinner with up to 30 ml per litre for airless and 100 ml per litre for conventional spray.
