

AUPR00010 Dulux Professional Polyurethane Gloss

Introduction

Part A
394-84182

Description and Image

Dulux Professional Polyurethane Gloss is an interior quick drying tough polyurethane modified alkyd clear finish with excellent gloss and abrasion resistance.

Features and Benefits

- Quick drying
- Abrasion resistant
- One Pack
- Polyurethanes dry faster than varnishes, saves time between coats
- Tougher & longer wearing than varnish, also used on timber & cork floors
- No messy mixing, no limited pot-life, saves time and product wastage

Uses

Dulux Professional Polyurethane Gloss is an attractive and durable interior polyurethane gloss finish on furniture, timber panelling and doors, timber and cork floors.

Precautions and Limitations

All preparation and painting must conform to AS2311: The Painting of Buildings.

Do not apply if the surface temperature is below 10C or conditions indicate it will fall below 10C during the drying period. If the temperature falls towards 10C or if the humidity is high, ensure air circulation is adequate by opening a window and using a fan.

Floors will stand light traffic after 8 hours drying, but should be allowed to dry for 3 days before heavy traffic.

Some cork tiles are impregnated with sealers which result in bubbling or non drying of clear top coats. It is important to test coat a small area to determine whether the surface is suitable for painting. A second coat must be applied to the test area to ensure there will be no re-coating problems.

Performance Guide

Weather For interior use only, not recommended for exterior use.	Salt Good resistance to salt splash
Heat Resistance Up to 80C. Premature yellowing and embrittlement will occur if film is subject to continuous heat.	Water Good resistance to water splash.
Solvent Resists dilute alcohol & hydrocarbons. Film is liable to attack from other strong solvents.	Abrasion Good resistance to abrasion.
Acid Good for dilute solutions	Alkali Good for dilute solutions

Typical Properties			
Gloss Level 85-100 at 60 degrees		Thinner Mineral Turpentine	
Colour Clear			
Components 1		Number of Coats 2-3	
Toxicity Lead free. Dry film is non-toxic and conforms to AS1647, Part 3.		V.O.C. Level < 440g/L untinted	
Touch Dry 4 Hours			
Clean Up  Thinner			
Clean Up Description Clean all equipment with Mineral Turpentine.			
Application Methods  Airless Spray  Brush  Roller			
Application Conditions		Solids by Volume	
		<input type="text" value="42"/>	
	Min	Max	Recommended
Wet Film Per Coat (microns)	<input type="text" value="91"/>	<input type="text" value="91"/>	<input type="text" value="91"/>
Dry Film Per Coat (microns)	<input type="text" value="38"/>	<input type="text" value="37"/>	<input type="text" value="38"/>
Recoat Time (min/hours)	<input type="text" value="6 hours"/>	<input type="text" value="Indefinite"/>	<input type="text"/>
Theoretical Spread Rate (m ² /L)	<input type="text" value="11"/>	<input type="text" value="11"/>	<input type="text" value="11"/>

Application Guide

Surface Preparation

Surfaces must be clean, dry and completely free from wax, floor polishes, etc. Surfaces previously painted with clear must be thoroughly sanded in direction of the grain to remove all traces of gloss. Fill all nail holes and cracks and sandpaper smooth in the direction of the grain, dust off with a soft clean cloth. For a superfine finish, fill open grained timber with a suitable filler. Stain bare timber surfaces if required with an interior stain.

For best results, seal timber grain with one coat of Dulux Professional Prepcoat Sanding Sealer before finishing coats.

Application Procedure and Equipment

Brush, roller, conventional or airless spray

Do not stir or shake Clear Gloss, to avoid aeration.

Brush/Roller

For a fine finish apply by brush or spray. Rollers and lambswool applicators may be used on floor surfaces. If Dulux Professional Polyurethane Sanding Sealer is not used, 3 coats may be needed for best results, lightly sanding between coats. When painting cork tiles thin first coat with up to 100 ml mineral turpentine per litre.

Airless/Conventional Spray

Suitable for application by all standard spray equipment. If necessary thin with spraying thinner with up to 30 ml per litre for airless and 100 ml per litre for conventional spray.
